

The Art of Facial Measurement

Forehead
Measure the width of your forehead at its widest point (typically around the hairline).

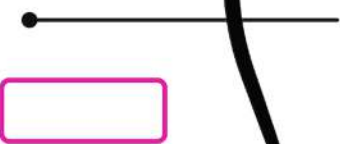

Measure from the center of your hairline down to the tip of your chin.

Face Length

Cheekbones

Measure across your cheekbones, starting from the outer edge of one cheekbone to the outer edge of the other.

Jawline

Measure from the tip of your chin to the bottom of your earlobe, along the curve of your jawline.

Face Shape

A long, horizontal pink rectangular box is provided for the user to write down their determined face shape.
